

PROJECT PART-FINANCED BY
THE EUROPEAN UNION

From innovative activities and policies through good
practice
Workshop II
Environmental protection as a prime driver for land
actors

Plan for Workshop II

- Presentation of participants
- Main question:
 - How can these kind of land actors stimulate the balance between protection and sustainable development (use)?
- Case: example from the Norwegian Fjords
- Point of view from each participants on main question
- Concluding remarks

Environment protection as the prime driver for land actors

- Main question: How can these kind of land actors stimulate the balance between protection and sustainable development (use)?
- Who are the actors and what actions do they take:
 - Historically and today
 - Are there new actors over time?
 - Are there any shift in perspectives among actors?
 - How is the relationship to other actors (economic actors)?
- What is the purpose of the protection:
 - Nature protection
 - Cultural landscape (including living areas)
- External factors
 - National and international actors
 - Cultural, social and economic factors
