

PROJECT PART-FINANCED BY
THE EUROPEAN UNION

Mission, objectives and organisation of the Theme 3

Dave Roberts, Highland Council
- Scientific Coordinators of Theme 3

Theme 3 Mission

To Identify and analyze innovative experiences and practices in the management of:-

- Landscapes
- Fragile rural areas
- Natural resources

Theme 3 Objectives

1. To study and report on the activities from each of the partners in relation to specific landscape management.
2. To understand the common and unique elements of each study project
3. To identify
 - i. Good operational models within each study project
 - ii. The key factors for success or even failure of activity and measures introduced for their support
 - iii. Elements of operational models and policy that might be transferable
 - iv. Recommendations for future activities and interventions at both regional and EU levels

Theme 3 organisation

The project had a Steering Group which guided the work of the scientific coordinators and each partner

Decisions were taken through the steering group and validated through consultation with all partners

Partners identified their own study projects supported by consultation with the Steering Group

All documents and reports were validated by the Partners

Cornerstones of Theme 3

- Strength of partnership
- Respecting and valuing different mountain cultures
- Focusing on living mountain landscapes
- Willingness to learn and adapt

Thank you
